

D5.2 Project website

Deliverable ID: D5.2 - Version 1.0

Due date: 01.12.2024

Page | 1

**Co-funded by
the European Union**

This project is co-funded under the EU4Health Programme 2021–2027 under grant agreement no.101160880. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Health and Digital Executive Agency. Neither the European Union nor the granting authority can be held responsible for them.

Document information

Project	
Project acronym	LH4L
Project Full Title	Lung Health for Life
Grant Agreement No	101160880
Project Coordinator	Lungs Europe
Website	https://europeanlung.org/lunghealth4life/
Starting Date	01.09.2024
Duration	36 months

Deliverable	
Deliverable No. - Title	D5.2 - Project website
Version	Final
Dissemination Level	Public
Deliverable Type	DEC
Work Package No. – Title	WP5 - Communications, dissemination, policy and sustainability
Deliverable Leader	Lungs Europe
Responsible Author(s)	Natalia Liagka
Contributing Author(s)	Lauren Anderson, Polina Starchenko, Vlatka Matkovic, Pippa Powell, Ivana Rae Almora
Due date	01.12.2024
Submission date	29.11.2024
Language	English

Executive Summary

This deliverable provides a description of the LH4L project's public website and its structure. The project website is an important dissemination tool, being one of the main channels to present LH4L to the project stakeholders and extended audience. It is an informative website that presents the main information, such as the objectives and structure, and provides links to the LH4L social media platforms for news and updates.

1. Introduction

The public website aims to communicate information about the project, its goals and its activities. It is a key dissemination and communication tool and provides a platform to efficiently share outcomes of LH4L. Project stakeholders and the general public can visit the website to understand what the project will address and how it will achieve its goal. The LH4L website has been developed under WP5 - Communications, dissemination, policy and sustainability.

This deliverable describes the LH4L project's public website. The following paragraphs describe the design and development of the website, its structure, and contents, and provide some considerations regarding future updates.

2. Website development

Image

The LH4L project's public website was designed as a microsite within the European Lung Foundation/Lungs Europe website for sustainability. It was designed to be user friendly and to provide the best possible experience.

The image of the website has the LH4L project's logo on the top left side of the page. The logo contains the name of the project with the image of the lungs and two children, a boy and a girl, jumping. The logo was chosen to be representative of young children and health. It is also visible at the bottom of the website's page, alongside the acknowledgement regarding Co-funding by the European Union. The colour palette is composed of several vivid colours, such as red, two different types of green, purple and orange. Colours are strong to represent a more child-friendly approach, and also be more appealing to younger audiences. The movement of the kids in the logo represents activity joy and health.

Development

The website layout was developed using the WordPress platform and it was registered under the domain <https://europeanlung.org/lunghealth4life> and www.lunghealth4life.eu. The website is accessible and usable from any web browser and platform, including mobile devices.

3. Web structure

The structure of the website is very simple. It follows a typical style with a logo on the top left that has the functionality to return to the homepage. Below the logo there is a menu bar composed of 5 sections:

- About the project
- Project partners
- Project coordination
- Project resources
- Community of Practice

All the sections of the website are accessible from the menu bar, which is always visible on the top of each page.

Homepage has three informative tabs:

- About the project
- Project resources
- News

On the top of the Home page there is a search bar and above that there is News and Contact.

**Co-funded by
the European Union**

This project is co-funded under the EU4Health Programme 2021–2027 under grant agreement no.101160880. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Health and Digital Executive Agency. Neither the European Union nor the granting authority can be held responsible for them.

About the project

This section explains in detail the objectives of the project in a concise manner. It also provides two buttons: one that takes the user to the profiles of the project partners and another one that leads to project coordination.

Project partners

This section presents the project partners with their logos. Each icon has a link to the institution's website and a short description.

Project coordination

This section is available either by clicking on the “project coordination” box at the bottom of “about the project” page, or by directly accessing it from the menu. It provides information regarding how the project is split into different work packages (WPs). There are 5 WPs and each of them is fully explained in a drop-down list.

LungHealth4Life was launched on 1 September 2024 and will run for 3 years. Led by Lung Europe (in partnership of European Respiratory Society and European Lung Foundation), the project consists of 6 partners. The overarching goal is to explore how lung health checks in schools are an effective key to protect lung health in a population. LungHealth4Life will run pilot projects in schools in Poland, Portugal and Hungary.

To achieve the goal, the project is divided into different areas of work, called Work Packages. You can read more information about the different areas of working by clicking the drop down options below.

- Project management and coordination (Work Package 1)
- Stakeholder engagement and Community of Practices (Work Package 2)
- Knowledge Hub (Work Package 3)
- Identifying and addressing inequalities at national level (Work Package 4)
- Communication, dissemination, policy and sustainability (Work Package 5)

**Co-funded by
the European Union**

This project is co-funded under the EU4Health Programme 2021–2027 under grant agreement no.101160880. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Health and Digital Executive Agency. Neither the European Union nor the granting authority can be held responsible for them.

The WP list is presented in 5 different tabs, one for each of the main pillars with a short description of the general objectives and the countries involved. The descriptions are written using lay language to ensure they can be understood by people external to the project.

LungHealthLife was launched on 1 September 2024 and will run for 3 years.
Led by Lung Europe (a partnership of European Respiratory Society and European Lung Foundation), the project consists of 6 partners. The overarching goal is to explore whether lung health checks in schools are an effective way to protect lung health in a population. LungHealthLife will run pilot projects in schools in Poland, Portugal and Hungary.
To achieve this goal, the project is divided into different areas of work, called Work Packages. You can read more information about the different areas of working by clicking the drop down options below.

Project management and coordination (Work Package 1)

Stakeholder engagement and Community of Practices (Work Package 2)

The objectives of Work Package 2 are:

- Bring together lung health organisations representing people from different backgrounds.
- Establish a platform to share knowledge and best practice between lung health groups, healthcare professionals (HCPs) and other stakeholders, known as the Community of Practice. This group will also provide feedback on materials developed for WPs.
- Include stakeholders in discussions around ethics.

Knowledge Hub (Work Package 3)

Identifying and addressing inequalities at national level (Work Package 4)

Communication, dissemination, policy and sustainability (Work Package 5)

Project resources

This section presents the materials that promote the project according to the needs of WPs and will be populated throughout the project. Some of the materials the user will be able to find here include flyer about the project and materials to use in schools.

Home > Project resources

Project resources

Healthy Lungs for Life for Schools

The European Lung Foundation runs a school's initiative to get young people excited about their lungs at school. They have developed a series of resources for schools. They are available for ages 5-7, 7-11 and 11-14 years and include worksheets, lesson slides and activities. They are free to access online and are available in English, German, Italian, Spanish and Catalan.

Community of Practice

This section presents the Community of Practice (CoP), a space where people with experience of health promotion in childhood can share knowledge, best practices, and help develop practical tools for schools. It presents the objectives of the Community and it provides three buttons: registration to the CoP, news and project resources.

Page | 11

**Co-funded by
the European Union**

This project is co-funded under the EU4Health Programme 2021–2027 under grant agreement no.101160880. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Health and Digital Executive Agency. Neither the European Union nor the granting authority can be held responsible for them.

Community of Practice

This Community of Practice (CoP) is a space where people with experience of health promotion in childhood can share knowledge, best practices, and help develop practical tools for schools.

This Community space brings together associations working with patients and youth communities, as well as education specialists and healthcare professionals, to discuss, share and, together, inspire new methodologies for lung health prevention in young people that can be replicated across Europe.

Objectives:

- **Build a knowledge network:** Create a space for diverse fields to exchange knowledge and experiences.
- **Share best practices:** Identify, collect and disseminate effective practices across the lung health sector.
- **Feedback and review:** Provide feedback on the materials developed in the L4HL project, such as educational, communication and prevention material, ensuring their relevance, accuracy, and usability for different groups.
- **Capacity building:** Strengthen skills and competencies within the network through peer learning and collaboration.

Are you a healthcare professional, respiratory patient advocate, teacher, policymaker or a civil society organization with experience in health education with children? Join our Community!

New EU project puts a spotlight on lung health in childhood

21/10/2024

Page | 12

**Co-funded by
the European Union**

This project is co-funded under the EU4Health Programme 2021–2027 under grant agreement no.101160880. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Health and Digital Executive Agency. Neither the European Union nor the granting authority can be held responsible for them.

LungHealth4Life launches putting a spotlight on children's lung health

LungHealth4Life has officially launched. The EU4Health-funded project, LungHealth4Life (LH4L), will introduce the concept of lung health checks and education on health risks to promote disease prevention. Read our press release to learn more about the project and its goals.

on the website on a regular basis. A map with details of all the countries with updates will also be included. The website will also have a legacy as it will live on the Lungs Europe website after the end of the project.

7. KPIs

The following are proposed KPIs for monitoring the success of the website. These will be monitored using Google web analytics.

- Number of active users per month.
- Average engagement time per active user.

These will be assessed each year with quantitative targets set each year to help built on success.
